**AB 450**  
**AB 650**

**The perfect alternative for working without scaffolding on all construction sites**

**Façade work regardless of building height**

**Variable working height adjustment for ergonomically convenient working**

**Modular aluminium platform system (segment length 1/2/3 m)**

**Push-to-connect galvanised outrigger modules**

### GEDA AB

GEDA Suspended Working Platforms allow working on all types of building façades without scaffolding.

The models GEDA AB 450 and GEDA AB 650 have been part of the GEDA range for many years, providing vertical transport for passengers and materials with a lifting force of 450 and 650 kg, respectively.

The operating height of the GEDA Suspended Working Platforms can be adjusted to within a centimetre, allowing work to always be carried out in the most ergonomically convenient position. Corner pieces and brackets can be used to adapt the platform to a wide variety of building shapes.

Easy and convenient handling is another crucial advantage. The push-to-connect design ensures fast assembly and disassembly of the galvanised outriggers. The individual components are very lightweight and can be transported by just one person, which also makes the assembled platform considerably easier to move.

Safety features such as the integrated tilt compensation and the overload protection ensure safe working at great heights.
